Dear Dr. Lederburg,

In the report of the discussion following R.A. Fisher's paper in *Biometrics* 1 (1948) it is said that you were intending to publish some work on the algebraic treatment of tetrad analysis.

This is a problem in which I am interested, and as I have not been able to locate any recent work of yours on this subject I should be grateful if you could tell me where it is to be found. I should also be grateful for reprints when they are available.

Yours sincerely,

T. C. Carter
